Turkeys require the s.pullorum mycoplasma gallisepticum tube agglutination test if they are 6 months old or older. Individuals presenting birds for show, fair, or exhibition must show proof of disease status by presenting one of the following:

Certified flock status

- a) NPIP participant or Affiliate Flock Certificate
- b) Wisconsin Tested Flock Certificate
- c) Wisconsin Associate Flock Certificate

Or

Wisconsin Individual Poultry Test Report

Individual identification must be on the test report (9-2 form)

Poultry are required to have a negative pullorum-typhoid test within 90 days PRIOR to arrival at the fair or exhibition. Therefore, testing on the fairgrounds for admittance does not comply with Wisconsin Administrative Code ATCP 11.62 (4) (b).

Negative pullorum testing is required for sexually mature birds, which in the case of turkeys, is considered to be 6 months of age and older. Anyone testing for pullorum is to be certified by the Wisconsin Department of Agriculture, Trade and Consumer Protection-Division of Animal Health and is to be knowledgeable in the fact that turkey pullorum testing requires the tube agglutination test and is to be conducted on turkey serum that is submitted to the Wisconsin Veterinary Diagnostic Laboratory at Barron, WI.

Turkey Blood tests are not to be conducted by the rapid whole blood plate agglutination test.
